

# An A-Z of Plants

## Amazing Fact

There are 80,000 edible plant species in the world. This means you could try something new every day for 220 years!

## Challenge

Can you think of the name of a plant for each letter of the alphabet?

You could use the Internet or non-fiction books to research different types of plants.

1. _____	14. _____
2. _____	15. _____
3. _____	16. _____
4. _____	17. _____
5. _____	18. _____
6. _____	19. _____
7. _____	20. _____
8. _____	21. _____
9. _____	22. _____
10. _____	23. _____
11. _____	24. _____
12. _____	25. _____
13. _____	26. _____

You could also try to find out:

- how many plants are actually used for food;
- why so few plants account for so much of our food;
- why so many plant species are endangered;
- how much of the earth's original rainforest has been cleared.
